

# CREATIONEVOLUTION

In the beginning  
God created  
the heaven and  
the earth. And  
the earth was  
without form,  
and void; and  
darkness was  
upon the face  
of the deep.  
And the Spirit  
of God moved  
upon the face  
of the waters.  
And God said,  
Let there be  
light: and there  
was light.  
Genesis 1:1-3

## Was Everything Created in 6 Days Or is it all just coincidence?

The Bible makes it very clear. In the beginning God spoke and created the heavens and the earth.

Yet today, many refuse to believe the Bible's clear statements and seek to find any other explanation for our existence, no matter how far fetched. The theory of evolution is patently unscientific at its core. In order for something to be called "science," it must be repeatable and observable. While it is true that animal species adapt to their environments, there has never been a single documented case of a species mutating into another species.

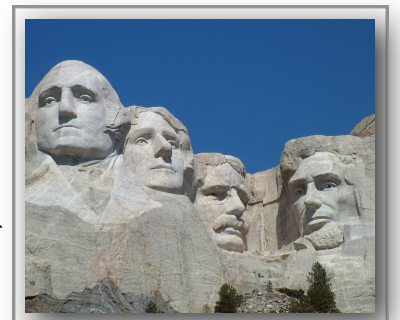

Besides this, evolution has no competent theory that adequately explains how the universe was

formed from nothing, where the first life came from, and how human intelligence sprang from animals.

Think of the question this way. What if you were walking in the forest and you looked up to see Mount Rushmore. (pictured below.) You would probably stare in awe at the beauty and wonder of the great landmark. As you are gazing at the faces carved into the mountain, a geologist comes up and starts a conversation with you. He says, "It sure is amazing isn't it? It is wonderful how the wind and rain carved those faces in the mountain over thousands of billions of years."

How would you respond to such an assertion. Do you think it

is possible, given any length of time, that wind, rain, and erosion could carve four faces in stone, which just so happened to look like four of America's great presidents? Yet this is exactly what many want us to believe about the incredibly more complex universe.

# The Greatest Evidence of Creation

The Bible nowhere offers “proof” that God created the heavens and the earth. The Bible simply states the fact. However, we must not think that science is somehow opposed to faith in God. On the contrary, modern science continues to provide evidence of what the Bible says. In this lesson, we will see some of these scientific facts that add weight to the Bible’s account of creation, but the greatest evidence of creation is not found in scientific examination.

Think about this. Right and wrong exist regardless of what we think. This means that everyone on the planet understands that rape, murder, and theft is wrong. There have been many instances where people have gone against these morals, but we all look at their actions, knowing that they are wrong. For example, I don’t care who you are or in what time you live, it is wrong for anyone to sexually abuse a child. It is wrong to rape someone. It is wrong to kill someone. I know very few people who would disagree with these absolute moral stances.

Yet, evolution and natural selection cannot say “WHY” it is wrong. The greatest good in the theory of evolution is for one individual to get his genes into the next generation. Therefore, why is it wrong to rape as many people as possible? Why is it wrong to kill off all the competition. In the naturalistic worldview, it is simply survival of the fittest.

**“One of the greatest proofs of the Christian worldview is without it, you cannot prove anything.”**

**Greg Bahnsen**

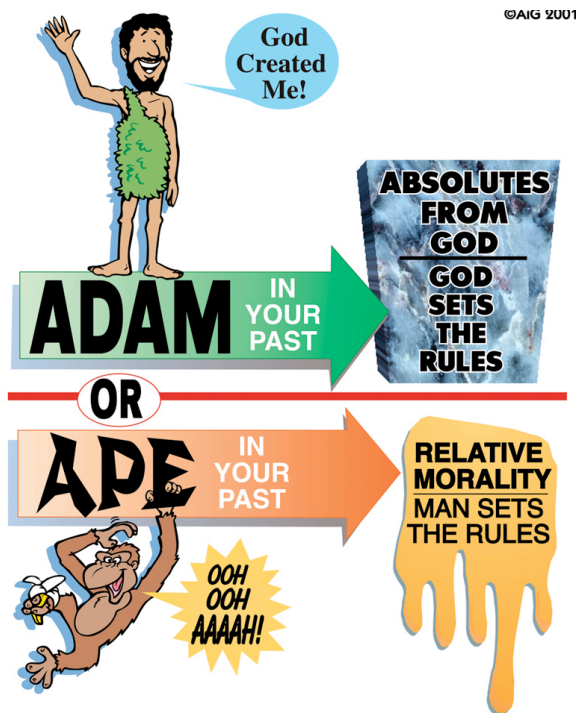

Is it wrong for a dog to forcefully mate with another dog? Is it wrong for a snake to “steal” an egg out of a bird’s nest? If humans are nothing more than evolved animals, why is it wrong for us to do these things?

Everyone understands that these things are wrong, but only the believer can say why they are wrong. They are wrong because God created man in His image. Every human has value in the eyes of God and humanity is higher than the animals.

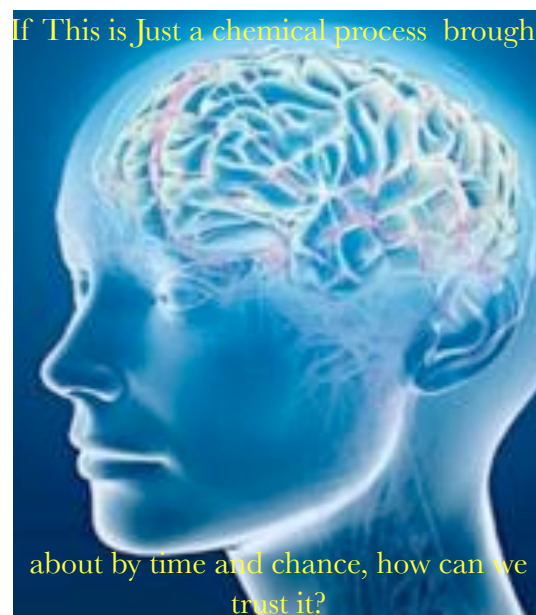

The same thing holds true with respect to logic. If there is no God, then the universe is nothing more than atoms banging around...matter in motion. If that is all there is, then our own thoughts are nothing more than atoms banging around. How can we trust reason and logic when our very own thoughts are nothing more than matter in motion? Simply put, we can’t. The only view that makes sense of the world we see around us is that it was created by a perfect, personal God.

## It comes down to authority

Man simply refuses to allow God to reign over him. Instead, he will grab at any theory which will put God out of the picture. It is much easier to live with our own morality if we convince ourselves there is no God. Instead, matter, chance, and millions of years are said to have created all things. It takes more faith to believe creation came about by accident from nothing at all, than it does to believe the Bible’s account.

If This is Just a chemical process brought

about by time and chance, how can we trust it?

# Evolutions Fatal Flaws

## The true F.A.C.E of evolution

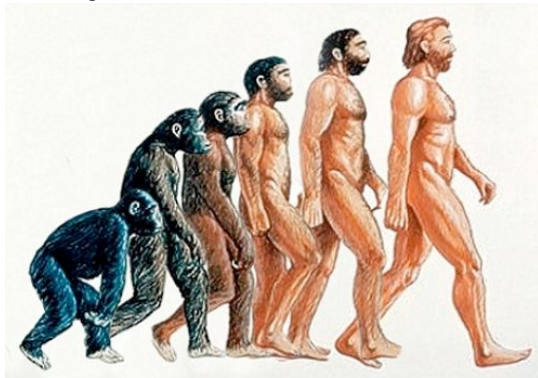

The fallacies of evolutionary theory are easily demonstrated by remembering a simple acronym. F.A.C.E. - evolution is absurd on its very face.

1. **F** - The Fossil Record - Although there are millions of fossils from different times, and from all over the world, there has never been a single fossil found of an animal that was in transition from one species to the next. It is common for people to say that birds evolved from reptiles, but all the fossils we have are either of birds or reptiles. No evidence of any transitional forms has ever been found.

David Raup, curator of the Field Museum of Natural History in Chicago said,

*"We are now about 120 years after Darwin and the knowledge of the fossil record has been greatly expanded. We now have a quarter of a million fossil species, but the situation hasn't changed much...We have even fewer examples of evolutionary transition than we had in Darwin's time."*

2. **A** - Ape Man Fiction -

Have you seen this picture, or one like it? Doesn't this prove evolution? In 1922, a picture of "Nebraska Man" hit London newspapers. A beautiful illustration of a furry, hunched over cave man was said to be based on fossil findings in Nebraska? What was this earth-shaking discovery? A single tooth. From a single tooth an artist sketched a jaw, a skull, facial features, and fur. Later Harold Cook discovered an identical tooth, but this tooth was attached to a pig's skull. "Nebraska Man" faded away.

In 1891, Eugene Dubois discovered "Java Man" on the island of Java. Yet, most people aren't aware that this "discovery" consisted of a skull-cap, a thigh bone, three teeth, and a great deal of imagination. In fact, the thigh bone was found fifty feet from the original discovery a full year later. Even after "java man" was debunked by the Selenka Expedition (19 evolutionists who set out to prove its truth), Time magazine still printed an article called, "How Man Began," referencing "java man" as factual evidence in 1994.

The beautiful picture you see above (and in many museums) is just that, a beautiful picture conceived in the minds of talented artists. Every "discovery" has been fantasy or fraud.

3. **C** - Chance created everything? Remember mount Rushmore on the first page? Is it possible that time and chance could produce something like that? Even if you put 10,000 monkey in a room full of typewriters, you would never

get a Shakespearean sonnet no matter how much time you allowed.

Now look at something we take for granted every day...your eye. The eye is one of the most complex structures ever conceived by the imagination. Even Charles Darwin looked at the complexity of the eye and said:

*"To suppose that the eye, with all its inimitable contrivances for adjusting the focus to different distances, for admitting different amounts of light, and for the correction of spherical and chromatic aberration, could have been formed by natural selection seems, I freely confess, absurd in the highest degree possible."* (In the Origin of Species).

If you would like to prove this hypothesis, take the pieces of a model airplane and lay them out on the table. How long would you have to leave it there before "chance" would begin to assemble the plane?

4. **E** - Empirical Science - The physical sciences are built on three laws of thermodynamics that describe energy relationships of all matter in the universe.

First law of Thermodynamics - Energy in neither created nor destroyed, it just changes form. So, this law of science clearly states that neither mass nor energy can come from nothing. There has to be a cause. Things don't just pop into existence by themselves.

Second law of Thermodynamics - In a closed system, the usable energy can only decrease as it is used. It never increases. This means that everything is running out of gas. The universe is constantly using energy, as do your bodies, the planets, and everything else. The 2nd law says that things always run from order to disorder and from complexity to decay. Yet this is exactly opposite of what the theory of evolution says. It says that simple amino acids got together and produced all life on earth.

(in case you are wondering, the 3rd law says if an object reaches absolute zero, its atoms stop moving.)

# Atheism

**The belief that there was nothing and nothing happened to nothing and then nothing magically exploded for no reason, creating everything and then a bunch of everything magically rearranged itself for no reason what so ever into self-replicating bits which then turned into dinosaurs.**

**Makes perfect sense.**

# The Perfect Balance of the Universe

# A PERFECT DESIGN POINTS TO A PERFECT DESIGNER

### Constant 1: Oxygen Level

On earth, oxygen comprises 21 percent of the atmosphere. That precise figure is an Anthropic Constant that makes life on earth possible. If oxygen were 25% fires would erupt spontaneously, if it were 15%, human beings would suffocate.

### Constant 2: Atmospheric Transparency

If the atmosphere were less transparent, not enough solar radiation would reach the earth's surface. If it were more transparent we would be bombarded with far too much solar radiation down here. (In addition to atmospheric transparency, the atmospheric composition of precise levels of nitrogen, oxygen, carbon dioxide and ozone are in themselves Anthropoc constants).

### Constant 3: Moon-Earth Gravitational Interaction

If the interaction were greater than it currently is, tidal effects on the oceans, atmosphere, and rotational period would be too severe. If it were less, orbital changes would cause climatic instabilities. In either event, life on earth would be impossible.

### Constant 4: Carbon Dioxide level

If the CO<sub>2</sub> level were higher than it is now, a runaway greenhouse effect would develop (we'd all burn up). If the level were lower than it is now, plants would not be able to maintain efficient photosynthesis (we'd all suffocate).

### Constant 5: Gravity

[illegible]

### Constant 6: Centrifugal Force

If the centrifugal force of planetary movements did not precisely balance the gravitational forces, nothing could be held in orbit around the sun.

### Constant 7: Rate Of Expansion

If the universe had expanded at a rate one millionth more slowly than it did, expansion would have stopped and the universe would have collapsed on itself before any stars had formed. If it had expanded faster, then no galaxies would have formed.

## Constant 8: Speed Of Light

Any of the laws of physics can be described as a function of the velocity of light (now defined to be 299,792,458 meters per second). Even a slight variation in the speed of light would alter the other constants and preclude the possibility of life on earth.

**Constant 9: Water Vapor Levels.** If water vapor levels in the atmosphere were greater than they are now, a runaway greenhouse effect would cause temperatures to rise too high for human life. If they were less, an insufficient greenhouse effect would make the earth too cold to support human life.

### Constant 10: Jupiter.

If Jupiter were not in it's current orbit, the earth would be bombarded with space material. Jupiter's gravitational field acts as a cosmic vacuum cleaner, attracting asteroids and comets that might otherwise strike earth.

### Constant II: The Earth's Crust.

If the thickness of the earth's crust were greater, too much oxygen would be transferred to the crust to support life. If it were thinner, volcanic and tectonic activity would make life impossible.

### Constant 12: The Earth's Rotation.

If the rotation of the earth took longer than 24 hours, temperature differences would be too great between night and day. If the rotation period were shorter, atmospheric wind velocities would be too great.

### Constant 13: Axis Tilt.

The 23-degree axis tilt of the earth is just right. If the tilt were altered slightly, surface temperatures would be too extreme on earth.

**Constant  $I_4$ : Atmospheric Discharge.**

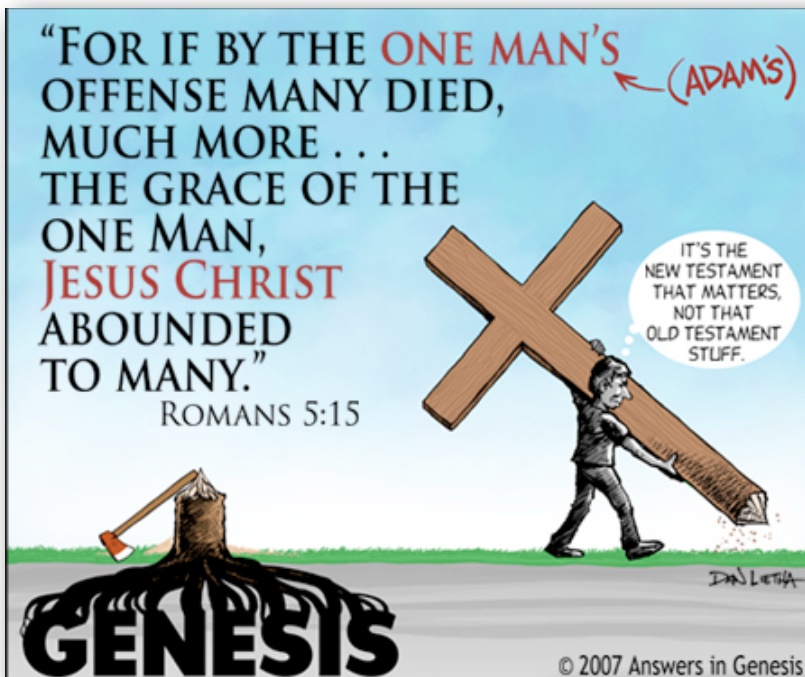

If the atmospheric discharge (lightning) rate were greater, there would be too much fire destruction; if it were less there would be little nitrogen fixings in the soil.

### Constant 15: Seismic Activity.

If there were more seismic activity, much more life would be lost; if there were less, nutrients on the ocean floors and in river runoff would not be cycled back to the continents through tectonic uplift. (yes, even earthquakes are necessary to sustain life as we know it).

## SEEM LIKE COINCIDENCE?

## Without Genesis 1 - there is no need for John 3:16

Many people claim to believe in Christ and the gospel of salvation, yet they deny the creation story of Genesis 1. This is an inconsistent position because the New Testament declares without apology that the problem of sin came through Adam, the first man.

If mankind came through millions of years of evolution, then there was no Adam, no fruit, no command of obedience. If there is no act of sin which brought about the curse, there is no need for a Savior to deliver us from the curse.

## Did death come from sin?

If mankind came about after millions of years of evolution, then we have millions of years of death and destruction before "Adam" ever existed. There are examples of cancerous tumors, animals eating other animals, and thorns in the fossil record. If God did not create in 6 days, as the Genesis account suggests, then all these things did not come from the curse of sin. If death did not come from sin, then the Bible's reason for needing a Savior is wrong.

There is no doubt that the entire Bible is woven into a perfect revelation of God. To unravel a single part is to destroy the whole.
